

ABOUT ARRAY BIOPHARMA

Array BioPharma Inc. is a fully-integrated, biopharmaceutical company focused on the discovery, development and commercialization of transformative and well-tolerated targeted small molecule drugs to treat patients afflicted with cancer and other high-burden diseases. Array markets in the United States BRAFTOVI™ (encorafenib) capsules in combination with MEKTOVI® (binimetinib) tablets for the treatment of patients with unresectable or metastatic melanoma with a *BRAF*^{V600E} or *BRAF*^{V600K} mutation. Array's lead clinical programs, encorafenib and binimetinib, are being investigated in over 30 clinical trials across a number of solid tumor indications, including a Phase 3 trial in *BRAF*-mutant colorectal cancer. Array's pipeline includes several additional programs currently in registration trials being advanced by us or current license-holders.

Maximizing Success of Encorafenib & Binimetinib is Array's Top Priority

Significant Pipeline Milestones Achieved...

... Important Value-Drivers

BRAFTOVI + MEKTOVI launched in US

- Positive reception from U.S. melanoma healthcare providers
- NCCN guidelines recommend BRAFTOVI + MEKTOVI as a Category 1 treatment option
- BRAFTOVI + MEKTOVI receives positive CHMP opinion for advanced BRAF-mutant melanoma
- sNDA submitted to seek inclusion of OS data in BRAFTOVI + MEKTOVI label

- Marketing applications in Europe and Japan under review

PHASE 3 / BRAF-MUTANT CRC

FDA grants Breakthrough Therapy Designation

- Plan to amend BEACON CRC protocol to allow for interim analysis based on consultation with FDA and EMA; analysis for U.S. sNDA based primarily on ORR and duration of response

Promising activity in safety lead-in reported at ESMO World GI 2018

- At the time of analysis, mOS not yet reached; OS mature through 12.6 months; 62% one-year OS rate

- Complete enrollment expected around end of the year
- Plan to seek accelerated approval in the U.S. based on positive results
- Topline results 1H19

COST SHARING

BEACON CRC co-funding: Pierre Fabre (40%), Ono Pharmaceuticals (milestone payments), Merck KGaA (Erbix supply)

Strategy

We are a fully-integrated, biopharmaceutical company focused on the discovery, development and commercialization of transformative and well-tolerated targeted small molecule drugs to treat patients afflicted with cancer and other high-burden diseases. Our strategy includes the following elements:

Inventing best-in-class small molecule drugs for patient populations which have significant unmet medical need

Conducting clinical trials which maximize the overall value of our programs for patients and Array

Building and maintaining an oncology focused sales, marketing and medical organization to commercialize our products in the U.S

Selectively partnering with early-stage research programs outside oncology
